

### Supplied Artwork

Supplied artwork must be submitted print ready. Our print ready specifications are listed below.

### Bleed

Bleed refers to the printing that goes beyond the fold line, allowing for folding and stitching your product to the final size. All colour or images that touch the edge need bleed.

### Resolution

Minimum resolution for print is 300dpi. The resolution displayed on the web is 72dpi. Images saved from the internet may not be suitable for print.

## Banner example 3000 x 1000mm

### 3100 x 1100mm Print File (including Bleed)

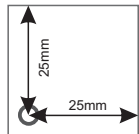

Black line represents final print file size. All background colour or image must continue into the "Bleed" area.  
**50mm bleed, sides, top & bottom**

### 3000 x 1000mm Fold Line

The red line represents the Fold Line where the "Bleed" area will be folded and stitched. Do not put any important information in the bleed area. **It will be folded to stitch.**

### 2850 x 850mm Internal Margin

Green line represents - safe zone. Important information should be placed **50mm inside the Final fold Line.**

For eyelets Please allow a minimum of 25mm space from border of print.

Each eyelet would be approximately 20mm in diameter and 500mm apart

allsigns print & design do not correct, modify or proof read your artwork. All files are printed as supplied to us.

allsigns print & design can not accept responsibility for errors due to files that do not meet these specifications.
