

Supplied Artwork

Supplied artwork must be submitted press ready for commercial printing. Our press ready specifications are listed below.

Bleed

Bleed refers to the printing that goes beyond the trim edge, allowing for movement on the guillotine when trimming your product down to size. All colour or images that touch the edge need bleed.

Resolution

Minimum resolution for print is 300dpi. The resolution displayed on the web is 72dpi. Images saved from the internet may not be suitable for print.

Print File (including Bleed)

Black line represents final print file size. All background colour or image must continue into the "Bleed" area.

Cut Line

The red line represents the final Cut Line where the "Bleed" area will be trimmed off. Do not put any important information in the bleed area. **It will be trimmed off.**

Safe Zone

Green line represents - safe zone. Important information should be placed **2mm inside the final Cut Line.**

allsigns print & design do not correct, modify or proof read your artwork. All files are printed as supplied to us.

allsigns print & design can not accept responsibility for errors due to files that do not meet these specifications.
